A. Norman Cranin, DDS, D. Eng
FAAID, FADSA, FICD, FAAHD, FADM, FACP, FBSE
The Dr. Samuel Cranin Dental Center
The Brookdale University Hospital and Medical Center
Brooklyn, New York
Chairman, Department of Dental and Oral Surgery and the Dental Implant Group
The Brookdale University Hospital and Medical Center
Clinical Professor, Oral and Maxillofacial Surgery and Implantology
New York University College of Dentistry
Clinical Professor, Oral and Maxillofacial Surgery, Prosthodontics and Biomaterials
University of Medicine and Dentistry of New Jersey
Adjunct Clinical Professor of Oral and Maxillofacial Surgery
University of Pennsylvania School of Dental Medicine
Associate Clinical Professor of Dentistry
The Mount Sinai School of Medicine
City University of New York
Consultant, Oral and Maxillofacial Surgeon
Brooklyn Developmental Center

Consultants

**Michael Klein, DDS**
Clinical Associate Professor
Department of Implant Dentistry
New York University
New York, New York
Clinical Assistant Professor
Department of Prosthodontics
University of Medicine and Dentistry of New Jersey
New Jersey Dental School
Newark, New Jersey
Private Practice
Cedarhurst, New York

**Alan Simons, DDS**
Private Practice
Farmington Hills, Michigan
Formerly, Associate Professor
Department of Diagnostics and Surgical Sciences
University of Detroit Mercy
School of Dentistry
Detroit, Michigan

**Second Edition**
with 1300 illustrations
# Contents

1 Introduction to the *Atlas of Oral Implantology*, 1

2 Implant Types and Their Uses, 4
   Implant Types, 4
   Endosteal implants, 4
   Root form implants, 4
   Crest Mini (thin ridge) and other mini implants, 4
   Blade implants, 5
   Ramus blade and ramus frame, 6
   Transosteal implants, 6
   Subperiosteal implants, 7
   Other implants, 7
   Endodontic stabilizers, 7
   Intramuscal inserts, 8
   Bone augmentation materials, including guided tissue regeneration, 8

3 Evaluation and Selection of the Implant Patient, 10
   Patient Screening and Medical Evaluation for Implant and Preprosthetic Surgery, 10
   Introduction to Patient Screening and Medical Evaluation, 10
   Absolute contraindications, 11
   Relative contraindications, 13
   Indications and Contraindications for Treatment, 17
   Laboratory Tests—in Office, 17
      Hematocrit examination, 17
      Blood sugar examination, 17
      Clotting time, 17
      Bleeding time, 18
   Absolute Systemic Contraindications, 18
   Relative Systemic Contraindications, 19
      Endocrinopathies, 19
      Local and regional problems, 26

4 How to Choose the Proper Implant, 27
   Diagnostic Methods, 27
      Examination, 27
      Study casts, 29
      Radiology, 30
      CT scanning, 32
      Methods of splint fabrication, 33
         Edentulous arch, 36
         Partially edentulous arch, 37
      Interpretation, 42
      Notes, 53
   Surgical Anatomy, 55
   Staging, 57

5 Prosthetic Options that Influence Implant Selections, 58
   Superstructures, 59
      Overdentures, 59
      Fxed bridges, 60
      Fxed-detachable bridges, 61
      Single crowns, 62
   Mesostructure Bars, 63
      Continuous bars, 63
      Noncontinuous bars, 64
      Methods of bar fixation, 64
   Types of Superstructure Attachments, 65
      Transepithelial Abutments, 66
6 Preparations for Implant Surgery, 68
Armamentarium and the Operatory, 68
Armamentarium, 68
The operatory, 69
Surgical delivery systems, 69
Electrical delivery systems, 70
Console, 70
Electric motors, 70
Troubleshooting, 71
Handpieces, 72
Power ranges of handpieces, 73
Burs and drills, 73
Air- or nitrogen-powered systems, 74
Important aspects of selecting a delivery system, 74
Surgical Principles of Value to the Implantologist, 75
Preoperative regimen, 75
Methods of anesthesia, 75
Sutures and suturing, 76
Suture materials, 76
Suture needles, 76
Methods of closure, 77
Interrupted sutures, 77
Horizontal mattress sutures, 78
Vertical mattress sutures, 79
Continuous box-lock sutures, 79
Periodontal sling sutures, 81

8 Hard Tissue Surgery and Bone Grafting, 109
Armamentarium, 109
Caveats, 110
General Guidelines, 110
Bone management, 110
Basic grafting procedures, 112
Periodontal defect correction, 112
The use of guided tissue regeneration membranes: resorbable and nonresorbable, 116
Ridge maintenance, 123
Technique, 123
Caveats, 123
Ridge augmentation, 124
Techniques, 125
Open flap, 127
Maxillofacial reconstruction, 130
Particulate, 131
Block form, 131
Platelet-rich gel, 131
Perimplant support and repair, 135
Bone Grafting for Root Form Implant Host Sites of Inadequate Dimension, 136
Caveats, 137
Techniques for obtaining autogenous bone, 137
Anterior iliac crest, 137
Rib, 140
Tuberosity, 140
Anterior border of the mandibular ramus, 140
Lateral border of the mandibular ramus/body, 142
Mandibular symphysis: manual retrieval, 142
Mandibular symphysis: trephine retrieval, 143
Grafting to Improve Ridge Dimension for the Accommodation of Implants, 147
Anterior mandibular width deficiencies, 147
Alveoplasty, 147
Monocortical block grafting, 147
Anterior mandibular height deficiencies, 147
Monocortical grafts, 147
Inferior border augmentation, 149
Posterior mandibular width deficiencies, 153
Alveo-lipoplasty, 153
Monocortical block grafting, 153
Posterior mandibular height deficiencies, 154
Monocortical block grafting, 154
Mandibular neuroplasty and nerve management, 154
Anterior maxillary width deficiencies, 157
Monocortical block grafting, 157
Expansion by longitudinal splitting, 157
Osteotomes (Sten-Oss and others), 159
Anterior maxillary height deficiencies, 160
Block grafting, 160
Nasal floor elevation, 160
Posterior maxillary width deficiencies, 160
Ridge splitting, 160
Monocortical block grafting, 160
Posterior maxillary height deficiencies, 162
Sinus floor elevation, closed techniques, 162
Sinus floor elevation, open techniques, 166
Posterior maxillary deficiency and miniplate, 170
9 Root Form Implant Surgery: Generic, 175
   Armamentarium, 175
   Caveats, 176
   Surgical Templates, 176
      Single tooth replacement or edentulous spans between natural teeth, 176
      Free-end saddle edentulous areas, 176
      Completely edentulous sites, 177
   Surgical Techniques, 177
      Threaded pre-tapping implants, 181
      Threaded self-tapping implants, 182
      Nonthreaded press-fit implants, 182
      Immediate placement of root form implants into extraction sites or former
      implant sites, 184
      Surgical technique, 185
      Uncovering submergible implants, 187

10 Root Form Implant Surgery: Proprietary I, 192
   Caveats, 192
   Nobel Biocare and 3i Systems, 193
   Sulzer-Calcitek Implant System, 195
   Spline Cylinders (Groove and Slot Abutment Connection System), 195
   Integral System (Nonhexed), 195
   Omniloc System (Externally hexed), 195
   Paragon Implant Systems, 196
      Bio-vent, 196
      Screw-vent, 196
      Taper-lock screw-vent, 196
      Micro-vent, 196
   Steri-Oss, 197
      Steri-Oss threaded implants, 197
      Steri-Oss replace system, 198
      Steri-Oss cylindrical press-fit implants, 198
      3.25, 3.25 Hex, 3.8, 3.8 Hex, 5 Hex, 198
      Steri-Oss IMZ implants, 199
   Lifecore Biomedical, 200
      Threaded implants, 200
      Sustain design, 200
      Restore design, 200
      Press-fit cylinders, 200
   Implant Innovations Incorporated, 202
   Straumann ITI, 202
      Hollow cylinder, hollow screw implants, 202
      Hollow cylinder, hollow screw, 202
      Solid screw, 202
      TPS screw, 202

11 Root Form Implant Surgery: Proprietary II, 206
   BioHorizons Maestro System, 206
   Bicon, 206
   Park Dental Startanius, Starvent, 207
   Oratronics Spiral, 209
   Omni-R, 209
   Kyocera Bioceram, 210
   Innova Endopore Implant, 210
   Friatec and Frialit 2, 211
   Sargon, 212
   Astra Tech Dental Implant, 213

12 Blade and Plate-Form Implant Surgery, 215
   Armamentarium, 215
   Caveats, 215
   Surgical Techniques, 216
      Conventional blade implants: single stage, 216
      Incision and reflection, 216
      Osteotomy, 217
      Implant placement, 219
      Closure, 220
      Alterable blade implants, 221
      Submergible blade and plate-form implants, 221
      Coated blade and plate-form implants, 222
      Custom-cost implants, 225
      Maxillary posterior blade and plate-form implants, 225
      Anterior blade and plate-form implants, 226
      Immediate placement of blade implants into extraction sites, 226
      Blade implants, 228

13 Ramus Frame and Ramus Blade Implant Surgery, 230
   Armamentarium, 230
   Caveats, 230
   RA-2 Ramus Frame (Pacific Implant Company), 230
   Surgery, 230
   RA-1 Ramus Frame (Pacific Implant Company), 234
   Surgery, 234
   Ramus Blade, 235
   Surgery, 235

14 Mandibular Subperiosteal Implant Surgery, 238
   Armamentarium, 238
   Caveats, 238
   Completely Edentulous Designs, 238
      Procedure, 239
      Incision, 239
      Reflection, 239
      Impression making, 240
      Surgical jaw relationship: centric recording, 241
      Closure, 241
      Implant design, 241
      Implant insertion, 242
   Edentulous Tripodal Design: Brookdale Bar, 244
      Procedure, 244
      Incisions, 244
      Reflection, 244
   Caveats, 245
      Impression, 245
      Design of casting, 246
      Insertion, 246
   Partially Edentulous Designs, 246
   Subperiosteal Implant Prosthodontics, 247
   Computer Assisted Design—Computer Assisted Manufacture (CAD-CAM) Technique, 249
   Armamentarium, 249
   Caveats, 249
      Preparing for the scan, 249
      Role of the radiologist, 250
      Stereolithography (laser-forming technology), 250
15 Maxillary Pterygohamular Subperiosteal Implant Surgery, 256
   Armamentarium, 256
   Caveats, 256
   Completely Edentulous Designs, 257
     Procedure, 257
     Incision, 257
     Reflection, 257
     Impression making, 258
     Surgical jaw relationship: centric recording, 259
     Closure, 259
     Implant design, 260
     Implant insertion, 261
   Partially Edentulous Universal Designs, 263
   Partially Edentulous Unilateral Maxillary Pterygohamular Designs, 265

16 Intramucosal Insert Surgery and Prosthodontics, 267
   Armamentarium, 267
   Caveats, 267
   Intramucosal Insert-Supported Complete Maxillary Dentures, 268
   Intramucosal Insert-Supported Unilateral Partial Dentures, 274
   Relining Full Upper Dentures that Have Lost Retention after Having Had Intramucosal Inserts, 275

17 Endodontic Stabilizer Implant Surgery, 276
   Armamentarium, 276
   Caveats, 276
   Matte-Finished Tapered Implants (Howmedica, Park), 277
   Stabilizers for Nonconforming Teeth, 280
   Threaded Implants, 280
   Ceramic-Coated Implants, 282

18 Transosteal Implant Surgery, Including the Mandibular Staple Bone Plate and Alternatives, 284
   Armamentarium, 284
   Caveats, 284
   Single-Unit Transosteal Implant, 285
   Mandibular Staple Bone Plate, 290
     Procedure, 290
   Armamentarium, 290
   Caveats, 290
   Smooth Staple Implant System (Interphase/Interpore), 293
   TMI (Bosker Transmandibular Reconstruction System), 294

19 Crete Mince and Other Minilplant Surgery and Prosthodontics, 296
   Armamentarium, 296
   Caveats, 296
   Crete Mince Implants, 296
     Surgical and prosthodontic techniques, 297
     Mini transitional implants, 300
     Mini subperiosteal button implants with intraoral bar welding, 302

Implant Prosthodontics: Introduction to Chapters 20, 21, 22, 23, 24, 25, 26, and 27, 304
   Armamentarium, 305
   Caveats, 305

20 Preliminary Prosthodontics: Fabricating a Template, 306
   Fully Edentulous, 306

21 Provisional Prostheses, 312
   Totally Edentulous Interim Prostheses, 312
     First stage, 312
     Second stage, 313
   Partially Edentulous Interim Prostheses, 314
     Single tooth implant restorations, 314
       First stage, 314
       Second stage, 314
     Partially edentulous, multiple implant restorations, 314
       First stage, 314
       Fixed provisional prostheses, 314
       Composite retained fixed provisional bridge, 315
       Removable provisional prostheses, 316
       Second stage, 317
       Fixed provisional prostheses, 317
       Progressive loading, 317
       Removable provisional prostheses, 319

22 Root Form Implant Prosthodontics: Abutments, 320
   Cement versus Screw Retention of Abutment-borne Prostheses, 322
     Cement retention, 322
     Advantages, 322
     Disadvantages, 323
     Screw retention, 323
   Attachment of Abutments to their Implants, 323
     Abutments for flat-surfaced implants, 323
     Abutments for implants with antirotational features, 324
     Antirotational features of various implant systems, 324
     Abutments that engage the antirotational component, 326
     Custom abutments, 327
     Abutments that bypass the antirotational component, 327
     Abutments for implants with the Morse-taper interface, 327
Abutment Designs, 330
Abutments that require crown or coping cementation, 330
Abutments for cement retention, 330
Straight abutment, 330
Straight abutment variants, 330
Angled abutments, 331
Angled abutment variants, 332
Abutments that require screws for crown or coping retention, 334

Abutment Types, 336
Flat-topped abutments, 336
Tapered shouldered abutments, 336
Tapered shouldered variants, 336
Direct gold copings, 336
Abutments for overdentures, 337
Immediate impression variants, 337
One-stage, two-piece implants, 339

23 Root Form Implant Prosthodontics: Single Tooth Implant Restorations, 341
Provisional Restorations, 341
Composite retained provisional restorations, 341
Surgical templates, 341
Impressions at Stage One Surgery: Implant Placement, 341
Abutments, 343
Impression Techniques, 344
Soft tissue model, 345
Provisional Restorations Used during Prosthesis Fabrication, 345
Crown Design, 345
Abutment insertion, 345
Crown insertion, 346
Occlusion, 347

24 Implant Prosthodontics: Fixed and Fixed-Detachable Prosthesis Design and Fabrication, 348
Prosthesis Support Requirements, 348
Preparatory Phases, 349
Staging, 349
Submergible (two-stage) implants, 349
Restoration of single-stage implants, 349
Provisional prostheses, 349
Temporary removable prostheses, 349
Conversion prostheses, 350
Provisional fixed prostheses, 350
Impression Making, 350
Fixed-cementable prostheses, 350
Single-stage implants, 350
Two-stage implants, 350
Fixed-detachable, unit type (anatomic) fixed prostheses, 352
Closed tray technique, 352
Open tray technique, 355
Interocclusal record making, 356
Superstructure Fabrication, 357
Casting materials, 357
Veneering materials, 357
Cantilevering, 359
Fixed-detachable superstructures, 359
“High-water” or hybrid design, 359
Insertion of the prosthesis, 359
Covering screw holes in a fixed-detachable bridge, 359
Cementation, 360

25 Implant Prosthodontics: Hybrid Bridge Fixed-Detachable Prosthesis Design and Fabrication, 362
Fully Edentulous Arch, 362
Provisional restoration, 362
Surgical template, 362
Abutment selection, 362
Prosthetic technique, 364
Metal framework try-in, 366
Insertion, 367
Occlusion, 367
Partially Edentulous Arch, 371
Electronic discharge machining or spark erosion, 372

26 Implant Prosthodontics: Overdentures and their Mesostructure Bars, 374
Full Subperiosteal Implants, 375
Universal Subperiosteal Implants, 379
Ramus Frame Implants, 381
Transosteal Implants, 381
Root Form Implants, 382
Provisional Restorations, 383
Surgical Templates, 383
Final Prosthesis Fabrication, 383
Abutment Selection, 385
Impression Making for Overdentures, 385
Verification Jig, Vertical Dimension, and Centric Relation, 387
Attachment Connection, 389
A Modified Transfer Technique, 390

27 Principles of Occlusion in Implantology, 394
Creating a Balanced Occlusal Scheme, 397
Functional Adjustment for Balanced Occlusion, 400

28 Diagnosis and Treatment of Complications, 404
Armamentarium, 404
Caveats, 404
Intraoperative Complications, 405
Endosteal implants, 405
Oversized osteotomy, 405
Perforations of cortical plates: root form, plate-form, and blade implants, 406
Fractured buccal or lingual cortical plates, 409
Inadequate soft tissue flaps for implant coverage, 409
Broken burs, 410
Intraoperative instrumentation, 410
Hemorrhage, 410
Poor angulation or position of an implant, 411
Injuries to the mandibular neurovascular bundle, 413
Subperiosteal implants, 414
  Loss of anesthesia, 414
  Inability to make an accurate impression, 414
  Inability to remove an impression or to seat a tray either for full upper
  (pterygomandibular design) or for full lower (lateral rami design)
  subperiosteal implants, 414
  Antral perforations, 414
  Inaccurate adaptation of full or unilateral subperiosteal implants, 415
  Inaccurate adaptation of tripodal subperiosteal implants, 415
  Injury to the infraorbital or mental nerves, 416

Short-Term Complications (First 6 Postoperative Months), 416
Endosteal implants, 416
  Postoperative infection, 416
  Dyesthesia, 417
  Dehiscent wounds, 418
  Dehiscent implants, 419
  Radiolucencies, 419
  Antral complications, 419
  Implant mobility, 422
  Postsurgical scar contracture, 422
Subperiosteal implants, 424
  Strut exposure, 424
  Postoperative infection, 425
  Scar contracture, pterygomandibular raphe, or anterior mandibular
  vestibule, 425

Long-Term Complications, 425
Endosteal implants, 425
  Ailing, failing, or failed implants, 425
  Adisite, 432
  Prosthetic management of implant loss, 432
  Fractured root form implants, 433
  Implants of improper angulation: the double-bar technique, 433
  Broken prosthetic inserts, 434
  Screw problems, 436
  Fabrication of implant-borne temporary prostheses, 436
  Fractured mesostructure bars, 436
  Partial loosening of cemented bars or prostheses, 438
  Inaccurate fit of castings, 438
  Fractured blade abutments, 438

Subperiosteal Implant, 440
  Bone resorption, 440
  Strut dehiscence, 440
  Recurrent pericervical granulomas, 440
  Broken abutments, 442
  Other more significant symptoms, 442
  Postsubperiosteal sublingual floor elevation, 442

Implantation in the Irradiated Jaw, 443

29 Maintenance and Hygiene, 446
  Periotest, 446
  Pocket watch, 447
  Measurements, 447
  Patient skills, 447
  Recall visit, 447
  Home care, 447

Appendices
A Past Medical and Dental History, 458
B Laboratory Values, 459
C CAD-CAM Computed Tomography, 460
D Stereolithographic Reproduction of Anatomic Structures Using
  C-T Scan, 462
E Treatment of Metals, 464
F Implant Surgery Consent Form, 465
G Postoperative Guidelines for the Surgeon, 466
H Postoperative Instructions for the Patient, 467
