CHAPTER 1
INTRODUCING PSYCHOLOGY'S HISTORY 1

Psychology and Its History 2
Why Study History? 3
Why Study Psychology's History? 6
Key Issues in Psychology's History 7
  Old Versus New History 7
CLOSE-UP: Edwin G. Boring (1886-1968) 11
Historiography: Doing and Writing History 15
  Sources of Historical Data 15
  Problems with the Writing of History 17
  Approaching Historical Truth 20
Summary 21
Study Questions 22
For Further Reading 22

CHAPTER 2
THE PHILOSOPHICAL CONTEXT 24

A Long Past 25
Descartes and the Beginnings of Modern Philosophy and
Science 25
  Descartes and the Rationalist Argument 27
  The Cartesian System: Rationalism, Nativism, and
Mechanistic Interactionism 28
ORIGINAL SOURCE EXCERPT: Descartes on Mind-Body
Interactionism 29
The British Empiricist Argument and the
Associationists 34
  John Locke (1632-1704): The Origins of British
Empiricism 34
  George Berkeley (1685-1753): Empiricism Applied to
Vision 38
British Associationism 40
CLOSE-UP: Raising a Philosopher 44
  John Stuart Mill (1806-1873): On the Verge of
Psychological Science 45
Rationalist Responses to Empiricism 49
  Gottfried Wilhelm Leibniz (1646-1716) 49
  Immanuel Kant (1724-1804) 50
In Perspective 50
Summary 51
Study Questions 52
Questions from the Original Source Excerpt 53
For Further Reading 53

CHAPTER 3
THE NEUROPHYSIOLOGICAL CONTEXT 54

Heroic Science in the Age of Enlightenment 55
Sensory Physiology 56
  Reflex Action 57
  The Bell-Magendie Law 57
  The Specific Energies of Nerves 59
  Helmholtz: The Physiologist's Physiologist 59
Localization of Brain Function 64
  The Phrenology of Gall and Spurzheim 64
CLOSE-UP: The Marketing of Phrenology 67
  Flourens and the Method of Ablation 68
  The Clinical Method 69
ORIGINAL SOURCE EXCERPT: Broca Discovers the
Speech Center 70
  Mapping the Brain: Electrical Stimulation 73
Early Twentieth-Century Studies of the Nervous System
and Behavior 75
  Neuron Theory 75
  Sir Charles Sherrington: The Synapse 76
  Karl Lashley: Learning and the Cortex 77
Summary 80
Study Questions 81
Questions from the Original Source Excerpt 82
For Further Reading 82

CHAPTER 4
WUNDT AND GERMAN PSYCHOLOGY 83

An Education in Germany 84
On the Threshold of Experimental Psychology:
  Psychophysics 85
  Ernst Weber (1795-1878) 85
Gustav Fechner (1801–1889) 87
Fechner’s Elements of Psychophysics 89
Wundt Establishes a New Psychology at Leipzig 90
Wilhelm Wundt (1832–1920): Creating a New Science 90
Wundt’s Conception of the New Psychology 92
Inside Wundt’s Laboratory 94
CLOSE-UP: An American in Leipzig 97
Rewriting History: The New and Improved Wilhelm Wundt 99
The Wundtian Legacy 101
The New Psychology Spreads 101
Hermann Ebbinghaus (1850–1909): The Experimental Study of Memory 101
ORIGINAL SOURCE EXCERPT: Ebbinghaus on Memory and Forgetting 102
G. E. Müller (1850–1934): The Experimentalist Prototype 108
Oswald Külpe (1862–1915): The Würzburg School 109
Summary 111
Study Questions 112
Questions from the Original Source Excerpt 113
For Further Reading 113

CHAPTER 5
DARWIN’S CENTURY: EVOLUTIONARY THINKING 114

The Species Problem 115
Charles Darwin (1809–1882) and the Theory of Evolution 116
The Shaping of a Naturalist 116
The Voyage of the Beagle 117
The Evolution of Darwin’s Theory 120
Darwin and Psychology’s History 124
The Origins of Comparative Psychology 125
Darwin on the Evolution of Emotional Expressions 125
CLOSE-UP: Douglas Spalding and the Experimental Study of Instinct 127
George Romanes (1848–1894): The Anecdotal Method 129
Conwy Lloyd Morgan (1852–1936): The Principle of Parsimony 130
Comparative Psychology in America 132
Studying Individual Differences 132
Francis Galton (1822–1911): Jack of All Sciences 132
ORIGINAL SOURCE EXCERPT: Galton on Measurement and Association 135
Darwin’s Century in Perspective 138
Summary 139

Study Questions 140
Questions from the Original Source Excerpt 141
For Further Reading 141

CHAPTER 6
AMERICAN PIONEERS 142

Psychology in Nineteenth-Century America 143
Faculty Psychology 143
The Modern University 145
William James (1842–1910): America’s First Psychologist 148
The Formative Years 149
A Life at Harvard 150
Creating American Psychology’s Most Famous Textbook 151
ORIGINAL SOURCE EXCERPT: William James on Emotion 154
James’s Later Years 157
Summing Up William James 159
G. Stanley Hall (1844–1924): Professionalizing Psychology 159
Hall’s Early Life and Education 160
From Johns Hopkins to Clark 161
Psychology at Clark 162
CLOSE-UP: Creating Maze Learning 163
Mary Whiton Calkins (1863–1930): Challenging the Male Monopoly 167
Calkins’s Life and Work 167
Other Women Pioneers: Untold Lives 170
In Perspective: The New Psychology at the Millennium 172
Summary 172
Study Questions 174
Questions from the Original Source Excerpt 174
For Further Reading 174

CHAPTER 7
STRUCTURALISM AND FUNCTIONALISM 176

Titchener’s Psychology: Structuralism 177
From Oxford to Leipzig to Cornell 178
Promoting Experimental Psychology at Cornell 179
Titchener’s Structuralist System 183
CLOSE-UP: The Introspective Attitude 185
Evaluating Titchener’s Contributions to Psychology 187
America’s Psychology: Functionalism 188
The Chicago Functionalists 189
The Columbia Functionalists 194
CHAPTER 12
MENTAL ILLNESS AND ITS TREATMENT 343

Early Treatment of the Mentally Ill 344
“Enlightened” Reform: Pinel, Tuke, and Rush 344
Reforming Asylums: Dix and Beers 346
CLOSE-UP: Diagnosing Mental Illness 348
Mesmerism and Hypnosis 350
Mesmerism and Animal Magnetism 350
From Mesmerism to Hypnosis 351
The Hypnotism Controversies 352
Sigmund Freud (1856–1939): Founding
Psychoanalysis 354
Early Life and Education 355
Creating Psychoanalysis 358
ORIGINAL SOURCE EXCERPT: Freud’s Lectures on
Psychoanalysis at Clark University 360
The Evolution of Psychoanalytic Theory 365
Freud’s Followers: Loyalty and Dissent 367
Psychoanalysis in America 368
Freud in Perspective 369
Clinical Psychology in America 370
Lightner Witmer (1867–1956): Creating Psychology’s
First Clinic 371
Clinical Psychology Prior to World War II 373
Summary 374
Study Questions 376

Questions from the Original Source Excerpt 377
For Further Reading 377

CHAPTER 13
PSYCHOLOGY’S PRACTITIONERS 378

Researchers and Practitioners 379
The Emergence of Modern Clinical Psychology 380
The Boulder Model 381
The Eysenck Study: Problems for Traditional
Psychotherapy 382
CLOSE-UP: The Medical Strategy—Lobotomies,
Transorbital and Otherwise 382
Behavior Therapy 384
The Humanistic Approach to Psychotherapy 385
ORIGINAL SOURCE EXCERPT: Rogers on Creating a
Therapeutic Environment 388
The Vail Conference and the Psy.D. Degree 392
Psychology and the World of Business and Industry 394
The Hawthorne Studies 395
The Practice of Psychology in Perspective 397
Summary 398
Study Questions 399
Questions from the Original Source Excerpt 400
For Further Reading 400

CHAPTER 14
PSYCHOLOGICAL SCIENCE
IN THE POST-WAR ERA 401

Cognitive Psychology Arrives (Again) 402
The Roots of Modern Cognitive Psychology 402
Frederick C. Bartlett (1886–1969): Constructing
Memory 403
ORIGINAL SOURCE EXCERPT: Bartlett on Memory 403
A Convergence of Influences 409
CLOSE-UP: What Revolution? 412
Magical Numbers, Selective Filters, and TOTE
Units 414
Neisser and the “Naming” of Cognitive
Psychology 416
The Evolution of Cognitive Psychology 417
Evaluating Cognitive Psychology 420
Other Research Areas 421
The Brain and Behavior 421
Social Psychology 423
Personality Psychology 426
Developmental Psychology 429
Research Psychology in Perspective 432
Summary 432
Study Questions 433
Questions from the Original Source Excerpt 434
For Further Reading 434

CHAPTER 15
LINKING PSYCHOLOGY'S PAST AND PRESENT 435

The Growth and Diversity of Psychology 436
Women in Psychology's History 436
Minorities in Psychology's History 439
Trends in Contemporary Psychology 442
The Future: Psychology or Psychologies? 443
Summary 444
Study Questions 445
For Further Reading 445
